

For this game do a reflection, how your

1. How was your term?

This term was not probably normal but I didn't do much outside of school and sadly didn't meet many new people. I probably could have joined more clubs and tried to reach out. Outside of school I had my job which I really enjoyed, I got to record classes for the business school and see a bunch of different types of classes. One thing I really liked was the library. It is fun to go into the stacks and try finding a book on a random subject, such as right now I am reading a book of creative casting. I think overall I had a good adjustment to living on my own and being able to make more decisions in my day to day life. The workload I had wasn't too bad but I don't feel like I learned as much as I would have liked to.

2. How was your experience in 185?

185 definitely wasn't what I was expecting from a EE class. I think that was for the better because I was still interested in how people learn and I feel that critical thinking translates better to other subjects. My favorite part of 185 were the free labs because it gave me an excuse to learn on my own and was at my own pace. I wish covid didn't ruin a lot of the student interactions as I didn't really interact with anybody else in the labs. I always found that working with other people is a great way of either reinforcing your knowledge or learning from others.
